VAHDETTIN KARATAS

SOFTWARE DEVELOPER

ABOUT ME

Passionate software developer with a strong interest in full-stack web and mobile app development. Over 4 years of experience in the development industry with a focus on creating user-friendly and intuitive apps and web applications.

SKILLS

NODE.JS-EXPRESS.JS

REACT.JS-NEXT.JS

KOTLIN

FLUTTER

FIREBASE

MONGODB

MYSQL

WHAT I USE

- BLOC State Management
- Kotlin Jetpack Compose
- Docker-Kubernetes
- Agile Methodologies
- Dependency Injection : Koin
- Unit Testing
- TailwindCSS

CERTIFICATES

- META Android Developer Certificate
- IBM Front-End Developer Professional Certificate
- IBM Full-Stack Developer Professional Certificate

LANGUANGE

Turkish   English

EXPERIENCE

04/2023-11/2023

MOBILE DEVELOPER
TUZLA-TASARIM

My role was creating user interfaces, working with databases, and using various APIs with Kotlin.I have improved existing Android app by adding more features.Collaborated with other developers on team projects using Agile development methodology.

09/2022-02/2023

MOBILE DEVELOPER
LOSCART

I have worked in different phases of the project cycle like design, development and testing.I have developed the activities and UI layers with Flutter and I was responsible for consuming the REST services, getting XML, JSON response and parsing them to get the required information.

01/2021-08/2022

SOFTWARE DEVELOPER
CRIPTOSWAPS

I was responsible for developing and maintaining the company's web applications using a combination of React.js , Node.js and MySQL.

01/2016-01/2018

WEBMASTER

As a webmaster,I was responsible for maintaining websites for my clients.Creating and managing the content and organization of those websites was my first step to the programming world.

EDUCATION

10/2018-10/2020

Computer Science-Bachelor
Politechnika Wrocławska-Poland
I could not finish it because of complicated pandemic situation.

10/2023-6/2026

Data Science-Bachelor
Czech University of Life Sciences in Prague

Dear Hiring Manager,

I'm excited to apply for the opportunity to join your team. With over four years of experience in software development, I consider myself somewhere between a junior and mid-level developer. I've worked on various projects, from web apps using React.js, Next.js, and Node.js to mobile apps with Kotlin and Flutter. I'm confident in my skills to create user-friendly applications, solve technical problems, and collaborate effectively with teams to deliver great results.

One of my recent projects was a cryptocurrency stock market platform, where I helped build an in-app feedback system to gather user insights directly from the platform. By integrating this feedback feature, we were able to quickly collect real-time suggestions and identify pain points from active traders. This allowed us to implement user-driven improvements, which increased engagement and led to a more tailored experience for our traders. The feature was designed to be user-friendly, encouraging traders to provide feedback without disrupting their experience on the platform.

Experiences like these have given me hands-on knowledge in designing interfaces, managing databases, and integrating APIs to ensure everything runs smoothly. Whether building new features or troubleshooting issues, I'm always ready to roll up my sleeves and get the job done.
I'm not just looking to bring my current skills to the table; I'm also eager to dive into any new technologies or methodologies your team uses. I see this as a chance to continue growing and adapting to the fast-paced tech environment while making a meaningful contribution. I'm particularly excited about the opportunity to work with advanced technologies that your team utilizes, as I believe this will enhance my development skills and allow me to make a significant impact.

I'm open to starting at an entry-level salary or proving my skills through a trial period. I'm confident that I'll quickly make a valuable contribution and earn my place in the team.
I would love the opportunity to discuss how my skills and experiences can help your team. I believe a brief conversation would reveal how my enthusiasm and capabilities align with your needs.
Thank you for considering my application. I look forward to hearing from you.

Best regards,
Vahdettin Karataş
